

1. Types of Mediums?

- * Copper cable (Twisted Pair)
- * Fiber optic cables
- * Wireless (Radio waves)

2. Write Down switch 8 Pins (RJ45)

Pin	Color
1	White-Orange
2	Orange
3	White-Green
4	Blue
5	White-Blue
6	Green
7	White-Brown
8	Brown

4. Explain Auto MDIX?

Auto-MDIX (Automatic Medium-Dependent Interface crossover) is a feature in network devices that automatically detects

and corrects the transmit and receive wiring.

- * It allows devices to work with straight-through or crossover cables.

- * It eliminates the need to manually select MDI or MDIX.

5. Explain POE Injector?

POE Injector (Power over Ethernet Injector) is a device that supply electrical power to a network cable along with data.

6. Explain POE Switch?

POE Switch (Power over Ethernet Switch) is a network switch that provide both network connectivity and electrical power through ethernet cables.

7. Explain Types of NIC & Function?

NIC (Network Interface Card) is a hardware components that allows a computer

or device to connect to a network.

Types of NIC:

1. Ethernet NIC (wired)

- * used ethernet cable.
- * connects to a switch or router
- * Example: RJ45 LAN Port.

2. Wireless NIC (Wi-Fi)

- * connects to networks wirelessly.

* Example: Laptop Wi-Fi adapter.

3. USB-NIC

- * External network adapter connected through USB.
